Raw Timber Species - Turned Handles

Half Moon Timber Handles | Half Moon Dished Timber Handles | Full Round Timber Handles | Leo Knobs

Raw Victorian Ash

Common in cool mountainous areas throughout Victoria. Straw to pale blonde and straw pink in appearance, often with gum vein features. Excellent staining qualities allowing for ready matching with other timbers or finishes. Also known as Tasmanian Oak

Raw Blackbutt

Grown in coastal forest in NSW & QLD. Straight grain timber, with a warm nutty hue which will compliment a range of interiors where a lighter palette is required. Borer holes and cracks may feature in the timber.

Raw American Oak

A native hardwood of North America. American Oak has a medium to coarse texture with a distinctive figure grain pattern common only to genuine oak species. Colour ranges from a pale to medium golden brown tone.

Raw Burnt Ash

American White Ash is grown in North America. A thermal modification process which is chemical free uses heat & steam to increase the durability of the timber. The process darkens the timber to a beautiful medium to rich dark chocolate colour.

Raw Spotted Gum

A premium Australian Hardwood, grown along the NSW coastal strip into QLD. Aside from its durability, it has a striking back-sawn grain, attractive fiddleback, and vibrant colour palette. Widely sort after by designers & architects, it's also ideal choice for matching to flooring.

Stained Timber Handles

Cadello Creast Handles | Heskett Peak Handles | Chicama Wave Handles

Raw American Oak

The handles in this range are made from reclaimed, recycled American Oak Timber. Mismatched timber offcuts are revived and crafted into stunning handles. Raw American Oak Handles have been sanded ready to be installed raw or stained to pair in with surrounding interiors.

Clear Coated American Oak

Handles are finished with clear Osmo Wood Wax finish which enhances and protects the natural grain of the timber without covering the grain up. Additionally the handles are easier to clean, stain and are water resistant. Wax finish is based on natural plant oils & waxes even suitable for children's toys.

Walnut Stained American Oak

American Oak timber finished with Walnut Osmo Wood Wax, changes the blonde american oak to a beautiful mid brown colour to match in with surrounding interiors while still maintaining the stunning American Oak grain. Osmo Wood Wax is based on natural plant oil & waxes and is stain & water resistant.

Ebony Stained American Oak

Finished with Ebony Osmo Wood Wax, creates a beautiful dark, dramatic colour. The dark, bordering on black, ebony wax really creates a feature of the unique grain of American Oak timber. Osmo Wood Wax is based on natural plant oil & waxes and is stain & water resistant.

Handburnished Leather Hyde Handles

Hyde

Hyde Natural
 The natural refers to the edges being left untouched. Burnished edges as show on previous page is a time consuming process used in traditional leatherwork. Burnishing seals any frays & makes for a longer lasting more durable handle. Hyde Natural Handles are ideal for wardrobes or furniture.

Pomolo

Artisan Knobs/Hooks

Pomolo Concrete Knob - Light Grey

- Handmade in Greece
- Ideal for a feature hook/hanger
- Air holes & colour tone variants are all part of the natural characteristic of concrete
- Waterproof seal to prevent against moisture absorption and stains
- An optional M4 lag screw is provided to facilitate front fixing for installation as a hanger
- Finish: Light Grey Concrete (LGY)

Part No.	Finish	Ø	P	B
A POM42.LGY	Light Grey	45	30	22
B POM72.LGY	Light Grey	72	33	27
C POM85.LGY	Light Grey	85	36	29
• POM175.LGY	Light Grey	170	70	50

Marine

Pomolo Concrete Knob - Dark Grey

- Handmade in Greece
- Ideal for a feature hook/hanger
- Air holes & colour tone variants are all part of the natural characteristic of concrete
- Waterproof seal to prevent against moisture absorption and stains
- An optional M4 lag screw is provided to facilitate front fixing for installation as a hanger
- Finish: Dark Grey Concrete (DGY)

Part No.	Finish	Ø	P	B
A POM42.DGY	Dark Grey	42	30	22
B POM72.DGY	Dark Grey	72	33	27

D GSZ80.901.MBL	Matt Black	29	57	29

OA = Overall length H = Height P = Projection

Vercelli Centre Profile (C-Shaped Profile) is designed to sit horizontally between two drawer fronts, creating a visual separation/ shadowline between each layer of drawers. The overlapping channel provides for finger access above and below the drawer for easy opening.

Vercelli Top Profile (L-Shaped Profile) rests between a countertop and the top drawers, creating consistent spacing between each layer. This profile provides easy finger access above the drawer front for easy opening.

Vercelli Top Profile External Corner is less common application works the same as internal corner. Snaps two top Profiles together on a 90° external corner.

Vercelli Profile
