## Why Salice Exedra System?

### Easy Install

Pocket doors are not for the apprentice on his first day, however the Exedra System along with the customised installation instructions is the easiest system on the market to install.

### Magnetic Soft Close

New superior soft closing system functions on magnets meaning the soft close will never fail. It gently controls the movement of the door while sliding in & out

### Concealed Door Cavity

Pocket door cavity is completely concealed when doors are closed

### Support

Pocket Doors Systems can be daunting the first time installing them, we're here to assist with any questions you have.

### Suitable for Doors -

Thickness 18mm to 30mm

Width: from 400mm to 900mm

Height: 1333mm - 2530mm

Max Weight 30kg per door

**Ask us about door sizes & design considerations**

## What our clients say...

*"My first Salice pocket door took me a day to install, however for every pocket door since it's taken me a lot less time than other systems on the market that I have used."*

*"The unit along with the customised drilling & measurements for each project makes it such a breeze to install. 100% recommend over all other pocket door systems I've tried"*

## SALICE Exedra2 Smart - Bi-Fold Pocket Door System

A unique, patented Bi-Fold pocket door system which facilitates the simultaneous movement of two linked doors. Exedra2 Smart requires less cabinet depth and the doors are all uniform. However, the door edges are visible when folded away into the pocket compartment.

# SALICE

## Why Salice Exedra2 Smart?

### Patented Door Opening System

The exterior surfaces of the door are always protected during opening & closing cycles.

### Short Pocket Depths

Suitable for smaller pocket depths. Door edges remain visible & protrude slightly when retracted.

### Magnetic Buffer

Magnetic buffer assists with cushioned door insertion.

### Uniform Sized Bi-fold Doors

Achieve a uniformed look. Up to four, uniform bi-fold doors can be achieved with 2 x Smart units

### Application

The absence of a front track means it can be used for a traditional cabinet, a wall recess for a walk-in-robe or raised from the ground on a cupboard

**Ask us about door sizes & design considerations.**

## **SALICE** Exedra2 Star - Bi-Fold Pocket Door System

A unique, patented Bi-Fold pocket door system which facilitates the simultaneous movement of two linked doors. The mechanism is always hidden by a cover panel fixed to the front of the system. Scan the QR code on the left-hand page to view the automatic motion of the Exedra2 Star.

# SALICE

## Why Salice Exedra2 Star?

### Patented Door Opening System

The exterior surfaces of the door are always protected during opening & closing cycles.

### Magnetic Buffer

Magnetic buffer assists with cushioned door insertion.

### Fully Concealed

The workings of the system are fully concealed behind the doors when open or closed

### Cabinet Handles

Can be installed with any style of handles

### Application

The absence of a front track means it can be used for a both traditional cabinet, in a wall recess for a walk in robe or raised from the ground on a cupboard
